II. Information received from Governments

A. Index of information submitted by Governments[1]

	State	Report received on	Data on exports	Data on imports	Background information		
					Military holdings	Procurement through national production	International transfers of small arms and light weapons
1.	Antigua and Barbuda	25.08.10	nil	nil			nil
2.	Argentina[a]	28.07.10	nil	yes	yes	nil	nil
3.	Brazil[b]	23.08.10	yes				
4.	Denmark[c]	28.07.10	yes				
5.	Hungary	29.07.10	yes	nil	yes		yes
6.	Israel	10.08.10	yes	yes			
7.	Italy	28.07.10	nil	yes	yes	yes	yes
8.	Lebanon	22.07.10	nil	nil		nil	nil
9.	Malaysia	18.08.10	nil	yes			
10.	New Zealand	31.08.10	nil	yes		nil	
11.	Poland	28.07.10	yes	yes	yes	yes	yes
12.	Portugal	20.07.10	nil	yes			nil
13.	Slovakia	25.08.10	yes	yes	yes	yes	yes
14.	Thailand	18.08.10	nil	yes			yes

[a] Argentina also provided information on its holdings of small arms and light weapons.
[b] Brazil provided information on its exports.
[c] Denmark provided supplementary information on its exports.

[1] With the submissions of Antigua and Barbuda, Argentina, Hungary, Israel, Italy, Lebanon, Malaysia, New Zealand, Poland, Portugal, Slovakia and Thailand, the number of replies received from Governments stands at 63.

B. Replies received from Governments on conventional arms transfers

Argentina

Reporting country: Argentina

Note: Data on military holdings valid as at 31 December 2009 with regard to holdings of military forces and internal security forces, as well as decommissioned, research and development and awaiting export equipment.

Israel

Background information on relevant policy and national legislation

In the arms control arena, which supplements the efforts made by the international community on the United Nations Register of Conventional Arms, Israel actively participates in the international negotiations on the enlargement of the Convention on Certain Conventional Weapons to deal with the humanitarian problems caused by the indiscriminate and irresponsible use of certain conventional weapons as it did on anti-personnel landmines, blinding lasers, advanced vertical launch systems, explosive remnants of war and other munitions, including cluster munitions in all its aspects. Israel, being a party to the Convention, also maintains its unilateral moratorium on all sales, exports and transfers of any anti-personnel landmines (in force until July 2011, with a view to prolong it for another three years until July 2014). Israel also participates in the preparatory consultations that will lead to the negotiations of a future arms trade treaty in 2012.

Israel views the illicit trade in small arms and light weapons, in all its aspects, and their use by unauthorized recipients, including terrorists, as an imminent threat to security and stability, which affects and harms civilian populations and societies. Such illicit trade also negatively affects development and post-conflict reconstruction and rehabilitation. In this regard, Israel took part in the negotiations of the Open-ended Working Group under the Programme of Action on Small Arms on Tracing Illicit small arms and light weapons and follows the operational guidelines of the international instrument adopted by the General Assembly in December 2005, to enable States to identify and trace, in a timely and reliable manner, illicit small arms and light weapons. Israel has also called, inter alia within the context of an arms trade treaty, for the creation of a clear and comprehensive norm which would prohibit the transfer of arms to terrorists.

In 2007 Israel upgraded its legal instruments governing national defence export controls by enacting a new Defence Export Control Act. Among other changes to existing legislation, the new Defence Export Control Act adopts the Wassenaar Arrangement control lists, upgrades and formalizes the consultation process between relevant authorities (Ministry of Defence, Ministry of Foreign Affairs, and Ministry of Industry, Trade and Labour) and enforcement mechanisms. Israel's competent authorities continue to outreach the defence industries to assimilate knowledge of the relevant regulations of the law. In addition to the legislative developments, a Defence Export Control Division has been established within the Ministry of Defence and a Defence Export Control Department within the Ministry of Foreign Affairs, consolidating and strengthening the existing export control units.

Pursuant to its comprehensive export control legislation and regulations, Israel controls very closely transfers of arms, military technology, related services and dual use items. In view of the specific threat, and following the principles of the Wassenaar Arrangement, Israel closely controls the man-portable air defence system (MANPADS) in all its aspects (as adopted by the Wassenaar Arrangement Plenary in December 2003).

Furthermore, Israel's conventional arms transfers policy puts several major restrictions and prohibitions on arms transfers, including on small arms and light weapons and their munitions. Restrictions and prohibitions are applied in decisions

to approve or deny marketing and export licences. These include, inter alia, considerations such as restrictions deriving from compliance with relevant arms control treaties and from Israel's adherence to export control regimes, compliance with Security Council resolutions, prohibitions on export to non-State actors, as well as to subversive and underground groups and to places where there is imminent risk that arms might be internally diverted, illicitly proliferated and retransferred or fall into the hands of terrorists or entities and States that support or sponsor them.

Annex

Views received from Governments in accordance with paragraph 6 (a) and (b) of General Assembly resolution 64/54

Israel

[Original: English]
[10 August 2010]

Israel welcomes the continued operation of the United Nations Register of Conventional Arms and the efforts made by the United Nations and member States of the Register to make this significant measure for confidence, trust and security building between States, as relevant and universal as possible, taking into account national, regional and global security concerns of all.

Convinced of the importance of reporting to the Register and the Register's contribution to regional and global stability and security, Israel has reported annually to the Register in accordance with its categories on the major conventional arms, since its foundation in 1992. **Israel's policy in reporting conventional arms transfers is that of the departure or arrival of relevant military equipment from or to areas under its jurisdiction.**

Israel believes that the Register should be consolidated through outreach to States in regions of concern, such as the Middle East, with the goal of bringing on board those States which do not currently report. This goal should be a priority for the Register. In our view, the Register should remain simple, focused and relevant to the aim it tries to achieve which is confidence- and security-building measures that will promote openness, indicate peaceful intentions and support the establishment of good neighbouring relations and the avoidance of an unnecessary arms race.

Israel supports multilateral and bilateral initiatives to eradicate the illicit trafficking and proliferation of conventional weapons in all its forms. Israel faces daily attacks by terrorist organizations targeting intentionally its civilian population and civilian objectives, including its civil aviation.

We urge States members of the Register to focus on preventive measures against terrorism. In this regard, special attention should be accorded to the illicit trade in and trafficking of weapons and munitions such as MANPADS, short range rockets and improvised explosive devices. Effective steps should be taken to prevent the illicit trafficking of the launching systems, munitions and critical ingredients for the explosives' construction.
